

# ICONS

**CROSS CUT**  
Cross saw series for cutting against the grain smoothly.

**RIP CUT**  
Rip saw series with chisel-like teeth for cutting along the grain.

**UNIVERSAL CUT**  
Universal saw series with combination teeth for cutting wood at any angle.

**HARD IMPULSE** **IMPULSE HARDENING**  
ZETSAW branded blades are made in-house. The teeth are hardened through a process called Hard Impulse. This increases the blade's hardness to 850-950HV (66-68HRC) which is the maximum hardness that can be achieved with steel. Treating the teeth in this way helps keep them sharp for much longer than conventional counterparts. The core of the blade remains both flexible and tough to prevent it from bending or buckling during use.

**No Set**  
Products with this icon do not have a Saw Set\*. This enables even flush and convex cuts.

\*Saw Set... The saw's teeth point right and left symmetrically. This results in a slightly wider kerf than the saw's own thickness, but less friction, therefore allowing the saw to cut smoothly. Products that don't show this icon have saw sets.

## RECIPROCATING SAW series

ZETSAW RECIPROCATING SAW blades are engineered to achieve extreme sharpness.

## WOODWORKING R-150

Ideal for work in narrow spaces and pocket cuts.

- Sawn wood
- Universal cut
- Pocket cut
- Ni-P plated
- Impulse Hardening

round foreblade for pocket cuts

NO.	ITEM	BOX	CTN	SPEC
20111	Blade	24	—	Blade Length 150mm Pitch 2.40mm Thickness 0.90mm

## WOODWORKING R-210

The sharply ground teeth and added foreblade for pocket cuts make it ideal for construction woodwork.

- Sawn wood
- Universal cut
- Pocket cut
- Ni-P plated
- Impulse Hardening

NO.	ITEM	BOX	CTN	SPEC
20100	Blade	24	288	Blade Length 210mm Pitch 3.00mm Thickness 0.90mm
20108	Blade (3pcs)	12	—	

## FINE WOOD & PRUNING R-300

Ideal for demolishing, renovation and aggressive pruning.

- Sawn wood
- Universal cut
- Green wood
- Ni-P plated
- Impulse Hardening

- DC over 14.4V cordless type
- AC Cord type

NO.	ITEM	BOX	CTN	SPEC
20110	Blade	24	—	Blade Length 300mm Pitch 3.50mm Thickness 1.20mm

## WALLBOARD R-90

Ideal for pocket cuts on plywood, laminated wood, plaster boards, etc. without a pre-drilled pilot hole.

- Sawn wood
- Drywall
- Curve
- Pocket cut
- Ni-P plated
- Impulse Hardening

back teeth for cutting out acute corner angles

NO.	ITEM	BOX	CTN	SPEC
20101	Blade	24	288	Blade Length 90mm Pitch 1.60mm Thickness 0.90mm

## POCKET CUTTING R-50

The blade is designed for cutting out boards without damaging electrical wires behind walls.

- Sawn wood
- Drywall
- Curve
- Pocket cut
- Ni-P plated
- Impulse Hardening

NO.	ITEM	BOX	CTN	SPEC
20107	Blade (3pcs)	12	—	Blade Length 50mm Pitch 1.60mm Thickness 0.90mm
