BLADE REPLACEMENT

Caution Please wear hand protection or wrap the blade in a cloth to prevent injury.

替刃 Hook-Fit

AUTHENTIC JAPANESE SAW series

UTILITY SAW series

PRUNING H-240/PRUNING H-210

Detachment

- Tap the handle end with the saw teeth facing upward to loosen the blade.
- Pull the blade out of the back metal.

※Never detach a blade by knocking the back of the blade toe.

Attachment

- Insert the blade into the back metal and hook onto the hook point.
- Push the blade into the gap of the back metal as a temporary lock.
- Tap the handle end gently with the saw teeth facing downward to fix the blade firmly.

※Never hit hard at once. Tap many times.

替刃 Hook-Fit

V HANDY H-200 / V H-265

△ Unfold the blade and make sure that the back metal is locked before replacing a blade.

Detachment

- Tap the handle end with the saw teeth facing upward to loosen the blade.
- Pull the blade out of the back metal.

※Never detach a blade by knocking the back of the blade toe.

Attachment

- Insert the blade into the back metal and hook onto the hook point.
- Push the blade into the gap of the back metal as a temporary lock.
- Tap the handle end gently with the saw teeth facing downward to fix the blade firmly.

※When opening and closing, adjust the tightness with the adjusting screw for looseness.

替刃 Hook-Fit

DOZUKI BACKSAW series

※This applies only to DOZUKI BACKSAW series.

Detachment

- Tap the blade end with the saw teeth facing upward to loosen the blade.
- Pull the blade out of the long back metal.

※Never detach a blade by knocking the back of the blade toe.

Attachment

- Insert the blade into the long back metal and hook onto the hook point.
- Push the blade into the gap of the long back metal as a temporary lock.
- Tap the long back metal gently with the saw teeth facing upward to fix the blade firmly.

※Never hit hard at once. Tap many times.

替刃 Screw-Fit

ZETSAW DIY series

FS/PRUNING SL

RYOBA 250

Detachment

- Loosen the screw with a coin or a screwdriver.
- Pull the blade out from the handle. (Do not remove the screw.)

Attachment

- Insert the blade.
- Cover the end slit of the blade and tighten the screw lock.
- Make sure the screw is tight and the blade doesn't rattle.

替刃 Screw-Fit

COMPASS series

Detachment

- Loosen the screw with a coin or a screwdriver.
- Pull the blade out from the handle. (Do not remove the screw.)

Attachment

- Insert the blade.
- Cover the hole of the blade and tighten the screw lock.
- Make sure of the loose screw and the rattling blade.

替刃 Pin-Fit

TUCK IN FOLDING SAW series

Detachment

- With the blade folded in, remove the bolt and the washer after loosening the bolt with a coin, etc.
- Pull the nut out.
- Remove the blade.

Attachment

- Insert the blade into the handle, ensuring the holes are aligned.
- Insert the nut.
- Insert the washer and bolt, ensure the blade can move smoothly before tightening the bolt.
